## Summary

The Atomic Nitrogen Generator ANG1 system is designed to decontaminate large spaces of bacteria and viruses. It works against the coronavirus. The machine generates monatomic nitrogen from common diatomic nitrogen, raising surrounding surfaces' pH to destroy biological contaminants. Monatomic nitrogen is safe for humans, and it can be released into the air to decontaminate large areas such as rooms, hallways, and shipping containers.

## PURPOSE OF USE

Decontamination of public areas:

- restaurants, cinemas
- food production areas
- subways, buses
- supermarkets
- airports, airplanes
- homes
- hospitals
- schools

## Technical data:

CODE.....,..... BW-ST-JS  
Model .....ANG1  
Pressure..... atmospheric  
Flow rate .....73l/min  
Weight .....350Kg, 833 Lb

Dimensions.....30 inch x 46 inch x  
 96inch  
 Max coverage.....19,000 Sq Ft  
 Air flow rate .....100,000 Cubic  
 Yards  
 Power absorption..... Fan 3 KW  
 Power supply.....110/220 V ,  
 60Hz  
 Protection rating .....IP54  
 Rotating range .....330 angle "0"  
 Elevation .....-25 C +35C , -13F  
 95 F  
 Fan diameter.....450 mm , 17.7  
 inch,2800RPM  
 Flow range .....approx. 30 m ,  
 98 Ft  
 Noise ..... 80 Lwa  
 ON / OF.....switch  
 Rotation.....right/left  
 Start water supply .....(motor pump/solenoid  
 valves)  
 Work/pause.....cycle timer
